Hurun Uth Innovators Series

The Mega Trends

There has never been a better time for entrepreneurship, with the tech developments in the ABCDEs, eg AI, Blockchain, Cloud, Data, Ecommerce, Fintech, 5G, Healthtech...

Post-Covid, many of the world's economies are looking to restart their economies, and are looking to encourage entrepreneurship.

It is the perfect time for the Hurun Uth Innovators Series.

Expected Number of People on Lists

High Influence Expected

HURUN estimates that the *HURUN U30s List* will generate **3 million views**, predominantly amongst the young entrepreneurs and investors, but also in countries across UK, Europe, as well as China and India. HURUN U30s List is expected to **attract 600 people**.

HURUN believes the investor network and the top young entrepreneurs in the world will publicize the list through their networks, meaning it is targeted at perhaps the most influential group of business individuals in the UK, Europe, China, India and the USA.

Sponsors will benefit from the halo effect of being associated with the global most exciting and dynamic young entrepreneurs.

Hurun Uth Innovators Series List and Events

Rupert Hoogewerf, Hurun Report Chairman and Chief Researcher, said ‘Hurun Uth Innovators Series is a celebration of the most successful young entrepreneurs in the world, the most likely to build the homegrown billion-dollar businesses of the future. I hope the Hurun Uth Innovators Series lists can inspire the next generation of ambitious entrepreneurs in their countries.’

A successful start-up ecosystem requires role models, both individuals, such as those from the Hurun Rich Lists, and companies, such as those from the Hurun 500 most valuable companies series. If a city or country can attract the world’s most successful entrepreneurs and companies to set up shop there, that will have a roll-on effect. Entrepreneurship is infectious and cities with lots of role models are likely to attract the brightest and best young entrepreneurs. It becomes a self-fulfilling prophecy.
